

VENKATA SAI MANIDEEP CHERUKURI

saimanideep.ch12345@gmail.com | +91 80963 68241 | github.com/manideep1428

EXPERIENCE

Emergx

Software Development Engineer Intern
emergx.ai

May 2025 – Sept 2025
Remote

- Built and shipped a full-stack AI platform supporting supply-chain workflows and automation.
- Developed frontend and backend systems used in production environments.
- Improved application scalability and reliability as the platform grew to over 5,000 users.

Freelance Technical Writer

Mintlify Documentation

2024 – 2025

- Authored developer documentation for Brew, Emby, and Debounce.
- Wrote API references, onboarding guides, authentication flows, and integration tutorials.
- Improved developer onboarding and product adoption through structured documentation.

EDUCATION

Loyola College

Bachelor of Computer Science (Dropout)

2024 – 2026
Guntur, India

PROJECTS

Kiver

Desktop Mission Control for AI Coding Agents
[GitHub](#)

Feb 2026 – Present

- Built a unified control plane and visual workspace for local AI coding agents (Claude Code and Codex CLI).
- Coordinated parallel autonomous subagents with deterministic SQLite file locking to prevent concurrent file conflicts.
- Implemented live terminal multiplexing with xterm.js/node-pty, zero-loss mid-task provider migration, and per-agent git rollbacks.

Supergent

AI Full-Stack App Builder
[Live Demo](#) | [GitHub](#)

Mar 2026 – Present

- Built an AI software engineer capable of generating complete web and mobile applications from a single prompt.
- Generates frontend, backend APIs, authentication, databases, and deployment configurations automatically.
- Implemented multi-agent planning, coding, debugging, and refinement workflows.

LovDacn UI

Open Source UI Component Library (Beta)
github.com/lovdacn-ui/ui

2026 – Present

- Creator and maintainer of an open-source React and Next.js UI component library.
- Building reusable UI components, templates, and developer tools using TypeScript and TailwindCSS.
- Currently in beta and actively expanding the component collection and documentation.

Instagram MCP

2026 – Present

MCP Server for Instagram Automation

[GitHub](#)

- Built a Model Context Protocol (MCP) server that lets AI agents automate Instagram through natural language commands.
- Integrated the Instagram Graph API with MCP-compatible clients such as Claude Desktop, Cursor, and Windsurf.
- Implemented tools for media publishing, profile and comment management, direct messaging, and account automation through a unified interface.

Niana

Jan 2026 – Present

AI Design Generation Platform

[niana.design](#)

- Built a platform that generates mobile UI designs from natural language prompts.
- Added direct export workflows for Figma integration.
- Launched subscription billing and onboarded paying users.

Astron

Feb 2026 – Present

AI Browser Automation CLI

[GitHub](#)

- Built a terminal-native browser automation platform powered by AI agents and natural language commands.
- Integrated OpenAI, Claude, Gemini, and Browser Use with seamless model switching.
- Added persistent daemon mode, browser session management, and secure credential storage.

Auto AI Video Generator

Dec 2024 – Jan 2025

[GitHub](#)

- Built an automated AI pipeline that creates videos from a single topic.
- Automated script writing, image generation, voice synthesis, editing, and publishing.
- Generated over 140,000+ views during the first week after launch.

Cheat-Coder

Dec 2024 – Jul 2025

AI Interview Assistant

[GitHub](#)

- Built a local-first AI interview assistant powered by user-provided API keys.
- Designed a privacy-focused architecture with zero server-side storage.
- Tested across hundreds of users in real interview environments.

ACHIEVEMENTS

- Participated and earned certification in **Mumbai Hack 2025 Hackathon**, demonstrating strong problem-solving and teamwork skills.

SKILLS

Programming	Python, TypeScript, JavaScript, SQL, HTML, CSS
Frontend	React, Next.js, React Native, TailwindCSS
Backend	Node.js, PostgreSQL, MongoDB, Prisma ORM, REST APIs
AI / LLMs	OpenAI SDK, Anthropic Claude SDK, Google Gemini SDK, Vercel AI SDK, LangChain, LangGraph, Hugging Face Transformers, PyTorch
Cloud & DevOps	AWS, GCP, Azure, Docker, Kubernetes, Supabase, Convex, Vercel
Tools	Git, GitHub, Linux, Postman, Razorpay
